

# PARTS STUDIO

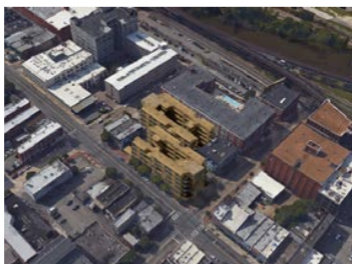

2016, Studio Project

Renderings (VRay, Photoshop), Wooden Model,  
Technical Drawings + Digital Diagrams

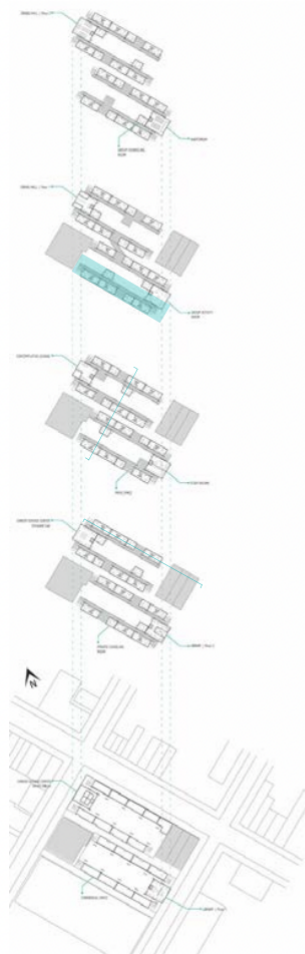

## FROM THE STREET

The building allows for more interaction on the urban street front due to the programming of the ground floor.

## UNDERSTANDING URBAN FABRIC

The location for the site is the Shockoe Bottom area of Richmond, VA. A historic up and coming neighborhood of the city.

## UTILIZING THE SITE

The existing buildings on the site, which was previously a parking lot, allow for fluid circulation between the two building structures.

## COMMERCIAL COURTYARD

The ground floor of the complex is meant for commercial use, allowing for more engagement with the surround urban streets + blocks.
