

CORRIDOR FACADE

The corridor facade allows for privacy within the residential unit, letting natural light in through long vertical clerestories.

STREET FACADE

The street facade allows for a public side, using windows to bring in natural light into the common spaces of the residential units.

EXPERIENCE IN SECTION

The two U-shaped structures allow for exciting exterior communal spaces. The courtyards allow for a vertical emphasis visually, while the wings of the complex allow for a visual horizontal emphasis in their facades.
